EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science in Computer Science (Honors), GPA: 3.79

June 2029

Honors: Dean's List (Winter 2026); STAR Scholar Research (Summer 2025); First Place-IEEE Scratch Competition (Fall 2025)

Relevant Coursework: Advanced Programming Tools and Techniques, Mathematical Foundations of Computer Science, Business Statistics, Linear Algebra, Multivariate Calculus, Cells and Biomolecules with Lab, Genetics and Evolution with Lab

SKILLS

- Programming Languages: C, C#, C++, Java, JavaScript, Python, R, SQL, TypeScript
- Libraries/Frameworks: ASP.NET, Chart.js, Flask, Node.js, NumPy, OpenCV, PyTorch, Pandas, React, Sanity JS
- Tools: Azure, Figma, Git, GitLab, IntelliJ, Jupyter, Maya, MongoDB, MySQL, Power BI, RStudio, ServiceNow, Trello

EXPERIENCE

IT Corporate Functions Co-op

Malvern, PA

Keenova Therapeutics, IT Corporate Functions

April 2026 – Present

- Architected a production RAG chatbot on Azure over a newly merged company's SharePoint sites and proprietary documents, deploying an ML system into real-world conditions as an enterprise knowledge assistant serving 1,600+ employees
- Built data pipelines and executed cross-tenant migrations alongside SMEs and currently developing a ServiceNow virtual agent with operator-facing self-service workflows, authoring 12+ end-user support documents to help users diagnose issues quickly

Software Development Research Assistant

Philadelphia, PA

Computational Cognitive Neuroscience Lab, University of Pennsylvania

October 2025 – Present

- Develop a full-stack open-source cognitive neuroscience platform using Sanity JS, building RESTful API endpoints and operator-facing dashboards that ingest and surface real-time behavioral telemetry for 30+ participants, per Figma design specs
- Improve data accuracy by 20%, automating validation that flags deviations from expected ranges, standardizing metadata, and generating analysis-ready reports from messy real-world signals

Research Data Analyst Intern

Remote

ThinkNeuro – Bibliometrics Research Internship

September 2025 – December 2025

- Developed an R data pipeline integrating Web of Science and Excel to clean, structure, and process 200+ neuroscience papers, implementing anomaly screening and quality assurance techniques for complex, messy bibliometric datasets
- Utilized statistical tools to identify time-series trends and quantify patterns in the top 100 cited papers (2016–2020), including a 15% decline in category-learning accuracy, translating complex data into actionable insights for stakeholders

Teaching Assistant – CI 102: Computing and Informatics Design II

Philadelphia, PA

Drexel University

September 2025 – December 2025

- Mentored 70+ students as Scrum Master on GitLab, leading weekly reviews with agile workflows, and advising on office hours
- Improved project quality by 30% via targeted guidance on Git, code reviews, and data-informed process improvements

Computational Simulation & Machine Learning Researcher

Philadelphia, PA

STAR Scholars Summer Research Program, Drexel University

June 2025 – August 2025

- Implemented a Python-based simulation modeling associative learning in 100 virtual fruit flies, creating structured time-series datasets and analytic tools to extract behavioral signals and performance metrics in a biological domain
- Achieved 88–90% accuracy for first-order and 20–25% for second-order simulations through statistical analysis and data visualization, benchmarking model performance and translating computational results into quantifiable insights

PROJECTS

NexaHealth, Avalanche x Foundry Hackathon

Philadelphia, PA

HealthTech Machine Learning Developer

November 2025

- Developed a wound assessment tool in Python, training and evaluating supervised detection models using TensorFlow, NumPy, and image-processing pipelines on the Kaggle wound image dataset to flag clinical anomalies from noisy camera data
- Collaborated in a cross-functional team under 36 hours to integrate trained models into a deployed system (Telegram chatbot, clinic-locator API, secure identity), demonstrating rapid iteration and data-to-deployment workflows

MindEd, AI Hackathon by Perplexity, University of Pennsylvania

Philadelphia, PA

Full-Stack Software Engineer

April 2025

- Developed a mental wellness web app using React and TypeScript to collect, preprocess, and visualize cognitive and stress-related data, building UI components and real-time monitoring dashboards that surface issues and user feedback
- Integrated Gemini API generating mental health predictions (0–100% scoring) with alerting thresholds and features including dyslexia-friendly fonts

CONFERENCE PRESENTATION

National Collegiate Research Conference (NCRC)

Harvard University

Poster Presentation – Accepted

January 2026

- Linn, T.R., & Stuart, B.L. (2026, January). *Computational Modeling of Odor-Associated Avoidance in Fruit Flies Using Cybernetic Automata*. Poster presentation at the National Collegiate Research Conference, Cambridge, MA.

LEADERSHIP & SERVICE

- **President**, Drexel Society of Computational Cognitive Neuroscience (September 2025 – Present)
- **Senator**, Drexel Undergraduate Student Government Association (January 2025 – Present)
- **Analyst**, Drexel Consulting Group (August 2025 – December 2025)
