EDUCATION

Drexel University	Philadelphia, PA
Bachelor of Science in Computer Science (Honors), GPA: 3.84	June 2029
Honors: Dean's List (Spring 2025); STAR Scholar - Summer Research Grant Recipient (Summer 2025); First Place – IEEE Scratch Competition (Fall 2025); Aspire Scholar (Fall 2025); Global Scholar (Fall 2024)	

SKILLS

- Programming Languages: C, C#, C++, Java, JavaScript, Python, R, SQL, TypeScript
- Libraries/Frameworks: Flask, HuggingFace, Matplotlib, NumPy, OpenCV, PyTorch, React, Sanity JS, TensorFlow
- Tools: Adobe, Docker, Excel, Figma, Git, GitLab, IntelliJ, Jupyter, Maya, Power BI, RStudio, Tableau, Trello

EXPERIENCE

Software Development Research Assistant	Philadelphia, PA
<i>Computational Cognitive Neuroscience Lab, University of Pennsylvania</i>	October 2025 – Present
• Develop a cognitive neuroscience experiment with 30+ participants, building a behavioral data collection and validation pipeline in Sanity JS to capture task performance metrics and structured response patterns in real time • Improve data reliability by 20%, introducing automated workflows, metadata standardization, and reducing manual errors, resolving edge cases, and strengthening collaborative analysis of behavioral variability across participants	

Teaching Assistant – CS570 (Graduate-Level Computer Science)	Philadelphia, PA
<i>Drexel University</i>	September 2025 – Present
• Mentor 25+ students in Python programming, object-oriented design, data structures, and algorithms through code reviews • Boost students' comprehension, providing personalized feedback, clarifying concepts, and solving technical challenges	

Applied Machine Learning Fellow	Remote
<i>Algoverse AI Research Program</i>	June 2025 – Present
• Implement a video-language modeling pipeline integrating V-JEPA2 with DINO visual representations to study how learned representations encode temporal structure and action dynamics, extending beyond static image-based recognition • Benchmark performance on the YouCook2 dataset against LLaMA-based and NVILA video-language models, identifying systematic limits in fine-grained action understanding and sequence-level representation	

Research Data Analyst Intern	Remote
<i>ThinkNeuro – Bibliometrics Research Internship</i>	September 2025 – December 2025
• Curated and analyzed a reproducible bibliometric dataset of 200 neuroscience papers from Web of Science using R, producing a standardized Top 100 corpus to study cross-study patterns in learning, representation, and adaptive behavior • Visualized citation trends and performance metrics across the Top 100 papers using Excel tables, bar charts, and summary graphs, identifying a 15% decline in category-learning accuracy and revealing systemic patterns	

Computational Simulation & Machine Learning Researcher	Philadelphia, PA
<i>STAR Scholars Summer Research Program, Drexel University</i>	June 2025 – August 2025
• Developed a cybernetic automata-based simulation of learning dynamics in 100 virtual fruit flies using Python, translating parameters from neuroscience experiments into structured datasets to model reinforcement learning in biological agents • Validated model behavior against experimental benchmarks, achieving 88–90% accuracy for first-order conditioning and 20–25% for second-order conditioning, and evaluating the effectiveness and limits of bio-inspired learning algorithms for adaptive systems	

Technical Support Specialist & Technical Mentor	Philadelphia, PA
<i>Drexel TechServ</i>	January 2025 – August 2025
• Provided hands-on technical support by refurbishing 50+ computers for community donations, troubleshooting hardware and software issues for 10+ residents at Genius Bar events, and teaching foundational digital literacy skills • Mentored 20+ middle school students in PC building, guiding assembly of core components including CPUs, motherboards, and adapting instruction to individual learning styles, fostering STEM confidence at the Young Dragons summer camp	

PROJECTS

NexaHealth, Avalanche x Foundry Hackathon	Philadelphia, PA
<i>HealthTech Machine Learning Developer</i>	November 2025
• Developed a wound assessment tool in Python, training and evaluating supervised machine learning models using TensorFlow, NumPy, and image-processing pipelines on the Kaggle wound image dataset to classify clinical images for healthcare analytics • Collaborated in a cross-functional team under 36 hours to integrate trained models into a deployable system (Telegram chatbot, clinic-locator API, secure identity), demonstrating rapid iteration and data-to-deployment workflows	

MindEd, AI Hackathon by Perplexity	Philadelphia, PA
<i>Full Stack Developer</i>	April 2025
• Developed a mental wellness web application using React and TypeScript, collecting, preprocessing, and visualizing cognitive and stress-related data through interactive dashboards for real-time analysis and user feedback • Integrated an AI assistant powered by the Gemini API to generate quantitative mental health scores (0–100%) and predictions of cognitive state, implementing inclusive accessibility features such as dyslexia-friendly fonts to ensure equitable user engagement	

ORGANIZATIONS

- Drexel Society of Computational Cognitive Neuroscience – President (January 2026 – Present)
- Drexel Consulting Group – Analyst (August 2025 – December 2025)

LANGUAGES

- Mon (Native), Burmese (Native), Mandarin Chinese (Elementary)
