EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science in Computer Science (Honors), Minor in Finance, GPA: 3.79

June 2029

Honors: OpenAI Dev Day 2026 Travel Full Scholarship; Dean's List(Winter 2026); Drexel STAR Scholar Research Grant(Summer 2025); First Place–Drexel IEEE Scratch Competition(Fall 2025); SemiFinalist-Asia-Pacific Code Olympiad (Summer 2023)

EXPERIENCE

Software Engineer

Malvern, PA

Keenova Therapeutics, IT Corporate Functions

April 2026 – Present

- Architected a RAG chatbot on Azure over a merged company's SharePoint sites and proprietary documents, deploying an ML inference pipeline into a regulated pharmaceutical environment as an enterprise AI assistant serving 1,600+ employees
- Implemented a ServiceNow Virtual Agent powered by custom NLU intent-classification models to resolve user requests, optimizing inference latency for real-time response; team won Gold at the 2026 Stevie Awards for Technology Team of the Year
- Executed cross-tenant migrations alongside 10+ SMEs, piloting my own domain migration first and recording every step with screenshots and visual walkthroughs to author 12+ enterprise-wide self-diagnosis support documents

Software Development Research Assistant

Philadelphia, PA

Computational Cognitive Neuroscience Lab, University of Pennsylvania

October 2025 – Present

- Develop a full-stack open-source neuroscience platform in React & Sanity JS, building RESTful API endpoints and dashboards that ingest and surface real-time behavioral telemetry for 30+ participants, optimizing data throughput per Figma design
- Improved data accuracy 20% by conducting detailed code reviews, debugging validation failures, adhering to structured PR templates, and aligning on technical walkthroughs in standup meetings to maintain high code reliability

Research Data Analyst Intern

Remote

ThinkNeuro – Bibliometrics Research Internship

September 2025 – December 2025

- Cleaned and quality-controlled 200+ Web of Science papers in R, curating Top-100 dataset for analysis with standardized fields
- Visualized citation trends in Excel charts/graphs across the dataset, surfacing a 15% decline in category-learning accuracy

Teaching Assistant – CS 570 Programming Foundations (Graduate-Level)

Philadelphia, PA

Drexel University

September 2025 – January 2026

- Mentored 30+ students in Python, OOP, data structures & algorithms, helping with debugging & systems-level reasoning
- Boosted comprehension with feedback, clarifying concepts and debugging challenging technical problems alongside students

Computational Simulation and Machine Learning Researcher

Philadelphia, PA

STAR Scholars Summer Research Program, Drexel University

June 2025 – August 2025

- Engineered a systems-level simulation in Go and Python mathematically modeling 100 virtual fruit flies' learning behaviors, implementing concurrent stimulus-timing logic and time-series analysis tools to quantify behavioral performance
- Achieved 88–90% accuracy for first-order and 20–25% for second-order protocols, applying statistical analysis and performance benchmarking against published experimental studies; work accepted to Harvard NCRC, NCUR, & Penn NRCP conferences

Applied Machine Learning Fellow

Remote

Vision-Text Feature Alignment for Action Recognition, Algorverse AI Research Program

June 2025 – December 2025

- Developed a video-understanding AI pipeline in Python (PyTorch) combining two self-supervised representation models (V-JEPA2, DINO) to measure how motion and temporal cues improve action recognition beyond static single-frame images
- Benchmarked the system against leading vision-language models (LLaMA, NVILA) on the YouCook2 video dataset, profiling per-class performance gaps to identify where models fail to distinguish fine-grained sequential actions

PROJECTS

Fixify – Agentic CI/CD Self-Healing Copilot

New York, NY

Full-Stack Developer, Shopify x Base44 Hackathon

August 2026

- Developed an agentic AI copilot (TypeScript, GitHub API, Vercel AI SDK) using Spec-Driven Development, repairing broken Shopify deployments, providing diagnostic tools to parse build logs, analyze commits, pinpoint root causes, and complete fixes
- Shipped a React dashboard with a side-by-side broken-vs-fixed code viewer plus 10 backend services that scan connected repos every 5 minutes and open a GitHub pull request on approval, cutting recovery from hours of manual work to under 30 seconds

Banking System Application

Philadelphia, PA

Software Test Engineer – Java

September 2025 – December 2025

- Architected a command-driven banking system in Java with 3+ account types and 5+ transaction operations, applying object-oriented and modular design to separate validation from business logic under (TDD) test-driven development practices
- Achieved 98% line and 95% mutation coverage across 300+ JUnit test cases, building a GitLab CI/CD pipeline to automatically execute unit, integration, and boundary scenarios, debugging edge-case failures to improve reliability on every commit

SKILLS

- Programming Languages: C, C#, C++, Java, JavaScript, Python, R, SQL, TypeScript
- Libraries/Frameworks: ASP.NET, Chart.js, Flask, Node.js, NumPy, OpenCV, PyTorch, Pandas, React, Sanity JS
- Tools: Azure, Cursor, Figma, Git, GitLab, IntelliJ, Jupyter, MongoDB, MySQL, Power BI, RStudio, ServiceNow, VSCode

LEADERSHIP & SERVICE

- **President**, Drexel Society of Computational Cognitive Neuroscience (September 2025 – Present)
- **Technical Support Specialist & Mentor**, Drexel TechServ (January 2025 – August 2025)
- **Analyst**, Drexel Consulting Group (August 2025 – December 2025)
- **User Interface Designer**, Drexel Society of Artificial Intelligence (May 2025 – July 2025)
