EDUCATION

Drexel University

Philadelphia, PA

Bachelor of Science in Computer Science (Honors), Minor in Finance, GPA: 3.79

June 2029

Honors: OpenAI Dev Day 2026 Travel Full Scholarship; Cornell Tech's Breakthrough Tech AI/ML Fellowship(Summer 2026); Dean's List(Winter 2026); STAR Scholar Research(Summer 2025); First Place-IEEE Scratch Competition(Fall 2025)

EXPERIENCE

IT Corporate Functions Developer Co-op

Malvern, PA

Keenova Therapeutics, IT Corporate Functions

April 2026 – Present

- Architected a production RAG chatbot on Azure over a newly merged company's SharePoint sites and proprietary documents, deploying an ML system into real-world conditions as an enterprise knowledge assistant serving 1,600+ employees
- Executed cross-tenant migrations alongside SMEs, authoring 12+ support documents to help users self-diagnose issues; developing a ServiceNow virtual agent with NLU intent training to interpret & route user requests to self-service workflows

Software Development Research Assistant

Philadelphia, PA

Computational Cognitive Neuroscience Lab, University of Pennsylvania

October 2025 – Present

- Develop a full-stack open-source cognitive neuroscience website platform using React & Sanity JS, building RESTful API endpoints and dashboards that ingest and surface real-time behavioral telemetry for 30+ participants, per Figma design
- Improve data accuracy by 20%, automating validation that flags deviations from expected ranges, standardizing metadata, and generating analysis-ready reports from high-volume, real-time data streams

Teaching Assistant – CS 570 (Graduate-Level)

Philadelphia, PA

Drexel University

September 2025 – January 2026

- Mentor 30+ students in Python, OOP, Data structures & Algorithms through code reviews, improving their problem-solving
- Boost comprehension with feedback, clarifying concepts and debugging challenging technical problems alongside students

Computational Simulation and Machine Learning Researcher

Philadelphia, PA

STAR Scholars Summer Research Program, Drexel University

June 2025 – August 2025

- Implemented a simulation modeling associative learning in 100 virtual fruit flies using a Go-based simulator, Python protocol scripts and stimulus-timing logic; curated time-series outputs and analysis tools to quantify behavioral performance
- Achieved 88–90% accuracy for first-order and 20–25% for second-order protocols, using statistical analysis and data visualization to benchmark model performance and support conclusions with quantitative evidence

Applied Machine Learning Fellow

Remote

Vision-Text Feature Alignment for Action Recognition, Algoverse AI Research Program

June 2025 – Present

- Designed and evaluated a video-language modeling pipeline integrating V-JEPA2 with DINO-based representations to quantify how temporal structure and motion affect learned representations beyond static image supervision
- Benchmarked model behavior on the YouCook2 dataset against LLaMA- and NVILA-based baselines, analyzing performance gaps to identify representation limitations and failure modes in fine-grained action understanding

PROJECTS

Banking System Application

Philadelphia, PA

Software Test Engineer – Java

September 2025 – December 2025

- Architected a command-driven banking system in Java with 3+ account types and 5+ transaction operations, applying object-oriented and modular design to separate validation from business logic under test-driven development practices
- Achieved 98% line and 95% mutation coverage across 300+ JUnit test cases spanning unit, integration, and boundary scenarios, validating transaction correctness, exception handling, and data integrity under failure conditions

NexaHealth, Avalanche x Foundry Hackathon

Philadelphia, PA

HealthTech Machine Learning Developer

November 2025

- Developed a wound assessment tool in Python, training and evaluating supervised detection models using TensorFlow, NumPy, and image-processing pipelines on the Kaggle wound image dataset to flag clinical anomalies from noisy camera data
- Collaborated in a cross-functional team under 36 hours to integrate trained models into a deployed system (Telegram chatbot, clinic-locator API, secure identity), demonstrating rapid iteration and data-to-deployment workflows

CONFERENCE PRESENTATION

National Collegiate Research Conference (NCRC)

Harvard University

Poster Presentation – Accepted

January 2026

- Linn, T.R., & Stuart, B.L. (2026, January). *Computational Modeling of Odor-Associated Avoidance in Fruit Flies Using Cybernetic Automata*. Poster presentation at the National Collegiate Research Conference, Cambridge, MA.

SKILLS

- Programming Languages: C, C#, C++, Java, JavaScript, Python, R, SQL, TypeScript
- Libraries/Frameworks: ASP.NET, Chart.js, Flask, Node.js, NumPy, OpenCV, PyTorch, Pandas, React, Sanity JS
- Tools: Azure, Figma, Git, GitLab, IntelliJ, Jupyter, Maya, MongoDB, MySQL, Power BI, RStudio, ServiceNow, Trello

LEADERSHIP & SERVICE

- President**, Drexel Society of Computational Cognitive Neuroscience (September 2025 – Present)
- Technical Support Specialist & Mentor**, Drexel TechServ (January 2025 – Present)
- Analyst**, Drexel Consulting Group (August 2025 – December 2025)
